

Journal Searching in MD Consult: Using Search Field Qualifiers

MD Consult offers full-text access to a collection of over forty clinical journals. Field qualifiers allow you to perform advanced searches of this journal content.

1. Login to **MDConsult** using your Campus Key and Password.
2. Click on the **Clinical Knowledge** tab and select **Journal Search w/Medline**.

3. Select **Journals** from the **Search within** box.

To Search for a Journal Title:

Enter the title of the journal followed by a space and the qualifier journal name **[jn]** in square brackets.

You may also use the standard (Index Medicus) abbreviation for the journal title. In that case, enter the abbreviation followed by the qualifier **[mdccite]**.
For example: ***N Engl J Med [mdccite]***

Be sure to insert a space before the field qualifier.

Other MD Consult Search Field Qualifiers

| Field to Search | MD Consult Field Qualifier | Example |
|---------------------------------------|--|--|
