

Reference Manager Workshop
Agenda
Reference Manager version 9.0 for Windows 95/98/NT

Overview of Software

Capabilities and uses

1. Personal reference bibliographic management system
2. Designed to keep track of specific references in your field of interest
3. Over 30 pre-defined reference types to choose from including: journals, books, conference proceedings, patents, slides and theses.
4. Can search for hundreds of libraries on the Internet from RF using single interface
5. Use Import function to import references from a text file
6. Once information is entered, you can retrieve them by searching for author, keyword, periodical name, year of publication, word or phrase appearing in the title or notes, reference type or other fields.
7. Special indicator reminds you whether you have a reprint of an article in your own file
8. Generate bibliographies formatted in virtually any journal style
9. Search PubMed

Similar Products [Endnote, ProCite]
