## Performing a quick retrieval on multiple terms

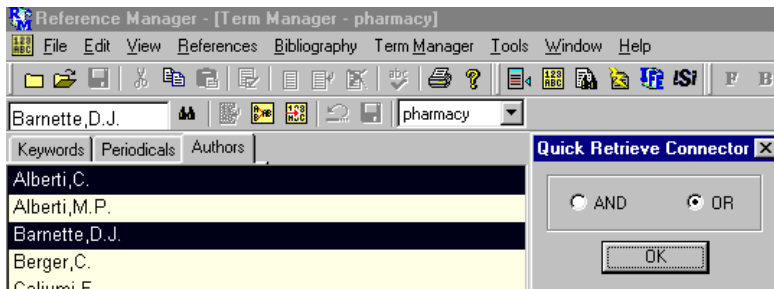

### Performing a quick retrieval on multiple terms

Highlight multiple terms in two ways:

- 1/ hold down [shift] key and click the first and last terms to highlight a range
- 2/ hold down [control] key and click each individual item

Using Quick Retrieval with two or more terms highlighted, the Quick Retrieval connector dialog box allows you to choose if you want these search terms to be connected using the AND logical connector or the OR logical connector.

- 1/ Select the terms that you want to combine
- 2/ Select quick retrieve from the term manager pull down menu
- 3/ Select AND or OR connector and then Click OK

4/ A retrieved database will be created
