

Who says you can't see the future?

See robotic prostate surgery. Live. On your computer.

Thursday, January 19 at 4:30 p.m.

The minimally invasive, robotic-assisted radical prostatectomy will be performed by Costas Lallas, MD, and Edouard Trabulsi, MD, and narrated by Leonard Gomella, MD.

- Jefferson's urologic oncologists were the first in the Delaware Valley to provide laparoscopic prostatectomy.
- By adding robotic technology, Jefferson's multidisciplinary urologic cancer team can now offer patients prostate removal surgery with less pain, a faster recovery and improved outcomes.
- Viewers will be able to ask questions online.

To view the procedure go to:

www.JeffersonHospital.org/webcast

A replay of the webcast will be available at the above site beginning January 20.

Jefferson Medical College of Thomas Jefferson University is accredited by the ACCME to provide continuing medical education for physicians.
